

작업 분배 내용

[고일범]

- 1. Complete TaskDetailActivity in java/com.example.tabler folder (with activity_task_detail.xml in res/layout folder)

Scenario : when click the daily subject's area, move to TablerActivity > TaskDetailActivity and user can see detail contents of that subject.

Implement Moving : TablerActivity >> TaskDetailActivity and contents of TaskDetailActivity and activity_task_detail.

its contents are detail of its subject, such as subject name, professor name, room number, and documentation.

(so, TablerActivity must send and askDetailActivity receive data of its subject's text data.)

- 2. List the "Virtual" Subject Example.

I need some 'virtual' case of subject for Demonstraion of App Situation.

send me just text with txt file.

List the '20' subject like this format :

[1]

Subject : Handson Project

Professor : Bang-Yung-Se

Time : Monday 1~3

Room : 209-501

Learning Object : Understanding of software technology and industry

[1]

Subject : UI Project

Professor : Kim-Mu-han

Time : Friday 4~7

Room : 211관 211호

Learning Object : Get skill of designing software UI with team project

[3]

...

to [20].

you can refer any syllabus, or you can create any subeject with your imagination.

better be subject's time is various.

[Common Notice]

1. Deadline is 12/12 1:00 PM in seoul time. Until this time, send me code and result.
2. Example ppt is just example configuration. (1~2 is for 고일범, 3~4 is for 가오즈항.) you must desing UI on your own and it must have some sense or some goodness.
3. If result is good, definitely I deliver you effort and contribution to professor and get you good score. I wish you can give good result.
